051-640-1581-XXX
Reference #06-91

Please call (916)323-3055 to request reasonable accommodations

Scope of the Position:

Under the general direction of a Data Processing Manager II, in the Business Systems Bureau, the incumbent will provide technical programming support for the Web Development Services (WDS) Unit. The WDS is responsible for the development and implementation of enterprise-wide, highly complex electronic information processing systems consisting of modern technology. The projects assigned to the team have enterprise-wide impact in the technology infrastructure including the design, development, operation and maintenance of the Controller's Office Internet and Intranet web sites. The projects include program application and development of web-enabled systems provided to the Controller's Office employees, state and local government customers, private industry partners, the constituents of California and Internet users worldwide.

Duties and Responsibilities:

Candidates must perform the following essential functions with or without reasonable accommodations

PERFORM SYSTEM DESIGN, ANALYSIS AND PROGRAMMING ACTIVITIES

- Define system, program and data requirements for the Audits MIS Tracking system/application.
- Develop web applications and provide programming to support the existing and future web enabled applications.
- Design, develop, implement and maintain complex programs using languages such as .Net, C#, VB.NET, ASP, ASP.NET, JavaScript, HTML, DHTML, CSS and XML to interface with Microsoft SQL Server databases.
- Develop design specifications for Web applications, which address the business and technical impact of the project's complex technical components in terms of interoperability, security, and dependability.

The State Controller's Office is committed to providing equal opportunity to all regardless of race, color, creed, national origin, ancestry, sex, marital status, gender, disability, religious or political affiliation, age, or sexual orientation.

PROJECT COORDINATION

- Implement and facilitate a quality assurance and control process to be used and applied to projects, support and consultants or contract staff deliverables.
- Obtain management approval of project scope, budget, staffing (both internal and external) and schedule.
- Develop project management work plans. Establish and track priorities, dependencies, completion dates and monitor progress. Use Microsoft's Project automated online project management software to accomplish all project management activities.
- Prepare feasibility studies (FSR's) and special project reports on budget, staffing, schedule, issues or changes for presentation to senior management.
- Provide direction concerning changes in priorities, project scope and schedule. Report progress on projects and related activities in meetings and monthly written reports.
- Facilitate personal services contracts for consultants or contractors. Track time, deliverables, and expenditures for these services.
- Implement risk, change control, and issue management processes for each project.

PERFORM WEB PUBLISHING FUNCTIONS

- Perform web publishing on an as needed basis.
- Develop alternatives and recommend preferred solutions in coordination with the Department of Technology Services (DTS), contractors, Internet Service Providers and customers.

Applications will be screened and only the most qualified will be interviewed

How to Apply:

All hires will be subject to a background check.

For permanent positions, SROA and Surplus candidates should attach "surplus letters" to their application. Failure to do so may result in your application not being considered.

Please submit a STD. 678 State Application and Résumé to:

State Controller's Office
